Andy Griffiths is the popular and award-winning author of the Just! Series and *The Day My Bum Went Psycho*. He lives in a bum-shelter with his family in Smellbourne where he divides his time between story-writing,

bum-fighting and pointing out that Uranus is actually the name of one of the planets in our solar system. *Zombie Bums from Uranus* is his second novel and is absolutely 100 per cent completely true except for the made-up bits*.

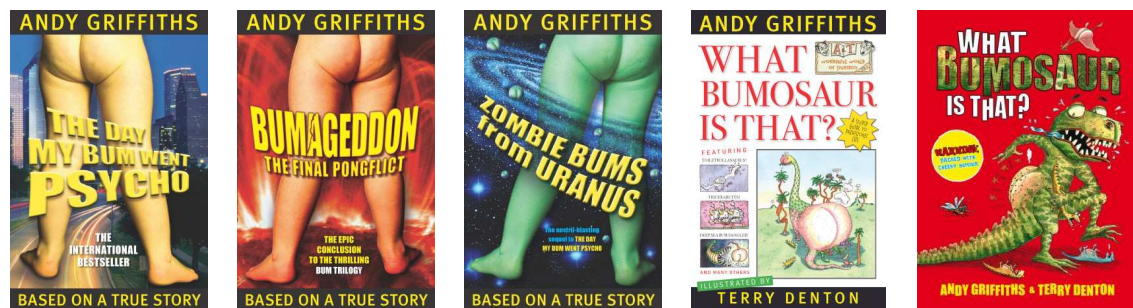

*NB It is absolutely 100 per cent completely true, however, that the made-up bits are absolutely 100 per cent completely made-up (except for the true bits).
