This book shows a new side to this voyage. Cook may never have stumbled onto the South East coast of Australia at all, if it had not been for a young Raiatean master Navigator named Tupaia. He came on board the ship Endeavour when it was in Tahitian waters, and essentially piloted the ship through much of the Pacific. He facilitated communication with the First Nation peoples they met, particularly in New Zealand, and on more than one occasion, saved Cook and his entourage from being massacred. This book does not document all that happened on that voyage. It puts into perspective the importance of Tupaia to the voyage that changed the course of history, and altered forever the lives of many people throughout the Pacific.

As he grew up, he learned to resolve conflict, becoming a step-dad to another family of wolves who had lost their alpha. But it all changed when the toughest pup of the family partnered with a rival pack. One day, the elder wolf and his wild-card stepson met on a ridge. Normally, this would lead to violence, but instead, they met in a graceful and powerful bow. The wolves of Yellowstone flourished.
