Angry with her mum for lots of things, for nothing and for everything. But most of all, she's angry with herself. For deserving it all. Because of what she did, or didn't do. Because one year ago she did something and her dad died. But then Persephone finds a body on a bush path, a young woman she doesn't know but feels a strong connection to. And as she tries to find out what happened to Sylvia, Persephone begins to understand her own place in the complex interconnectedness of the universe. Sugar is the story of a sixteen-year-old girl trying to make sense of the life-changing events that have sent her world into a spin, her search for a reason behind it all, and ultimately her acceptance of life's randomness. 75. Code Breaker: Young Readers Edition, The (Walter Isaacson)

When Jennifer Doudna was a sixth grader in Hilo, Hawaii, she came home from school one afternoon and found a book on her bed. It was The Double Helix, James Watson's account of how he and Francis Crick had discovered the structure of DNA, the spiral-staircase molecule that carries the genetic instruction code for all forms of life. This book guided Jennifer Doudna to focus her studies not on DNA, but on what seemed to take a backseat in biochemistry: figuring out the structure of RNA, a closely related molecule that enables the genetic instructions coded in DNA to express themselves. Doudna became an expert in determining the shapes and structures of these RNA molecules -an expertise that led her to develop a revolutionary new technique that could edit human genes. Today gene-editing technologies such as CRISPR are already being used to eliminate simple genetic defects that cause disorders such as Tay-Sachs and sickle cell anemia. For now, however, Jennifer and her team are being deployed against our most immediate threat-the coronavirus-and you have just been given a front row seat to that war.
